RE: PS Docket 06-229; WTB Docket 02-378

Dear Sir,

The Region 21 700 MHz Regional Plan Update Committee respectfully requests Commission approval of the second revision of our Region 21 700 MHz plan. In this revision we add the former "Reserve" channels and call out six of these for "Deployable Trunked" use. These additions may be found under two new section headings within the body of our plan: RESERVE CHANNELS and DEPLOYABLE TRUNKED CHANNELS. These titles have been highlighted in yellow in the draft revision for your convenience.

The Region 21 700 MHz RPC begs the Commission's indulgence by allowing us to add the sixteen (16) 700 MHz Air to Ground channels into our plan at a later date. It was unclear as to whether or not the State of Michigan desired to administer the Air to Ground channels. This question has been resolved with a letter from Michigan's SWIC granting authorization to the Region 21 700 MHz RPC to administer the Air to Ground channels. Unfortunately, this authorization came too late to include the Air to Ground channels in this revision by the October 31, 2015 deadline.

Thank you for your continued support of the regional planning process. If you have any questions or require further information, please do not hesitate to contact me at 586-469-6433.

Respectfully,

Keith M. Bradshaw, Chairman
Region 21 700 MHz Regional Planning Committee
Michigan Public Safety Frequency Advisory Committee
